

**LOW VISION PRODUCTS
2023-2024**

WHO WE ARE

We set out to make a difference in December of 2017, and have been growing ever since. We specialize in matching the appropriate items to your specific needs. Your vision and challenges are unique to you, and we will take the time to ask questions and listen before recommending anything.

All consultations and demonstrations can be performed in your home or office, and are free of charge or obligation.

In addition to private appointments, we also work closely with VA clinics, various not-for-profit blindness associations, BOCES programs, school districts, and some doctors.

We look forward to speaking with you or your loved ones. Please contact us today.
