- Display ink text along with braille for easier proofing
- 130+ languages supported
- Extensive math, science and music code support
- Spell-check with 300,000+ word dictionary
- Supports all commercial braille embossers

**Price: \$695.00**

## TactileView Design Suite

Software & Hardware for Tactile Graphics

Includes: TactiPad Drawing Tablet, TactileView Design Software, Graph Grid & Circle Frame

### TactiPad Drawing Tablet

- Draw raised graphics instantly!
- Place the drawing paper on the tablet and use a pen or stylus to begin drawing. As you draw a raised line will appear so you can see the results instantly
- Add the graph grid and circle frame to assist with drawing accessible graphs, tables, pie charts and more!

### TactileView Design Software

- Create your own tactile graphics easily!
- Use the drawing tools within the software to make custom graphics
- Use as it suits you: Fully accessible with the mouse, keyboard or screen reader
- Import or scan images and convert them to line drawings
- Add braille and audio labels to create even more interactivity
- Use the math module to create graphs of any equation
- Automatically translate equations to Nemeth and other braille math codes
- Preview the free online catalog for thousands of pre-made images

### Graph Grid & Circle Frame Accessories

- Use the graph grid to draw graphs, tables, bar charts and other grid-based diagrams. You can even adjust the flexible bands to customize your grid lines
- Use the circle frame to create pie charts, a clock, mandalas and other circular drawings

### TactiPad Drawing Tablet

**\$499.00**

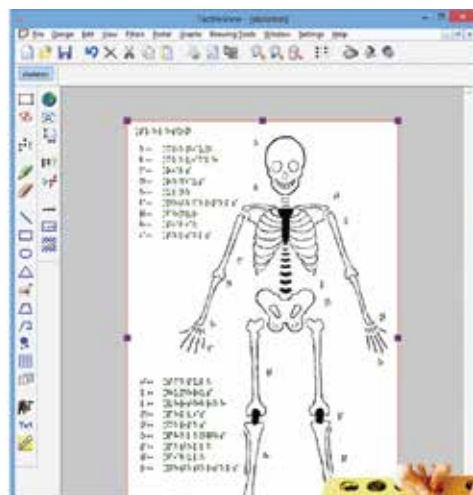

### TactileView Design Software

**\$595.00**

### TactileView Design Suite

Includes: TactiPad Drawing Tablet, TactileView Design Software, Graph Grid & Circle Frame

**\$1,299.00**

### Tactile Graphics for STEM

Full range of braille and tactile graphics tools for STEM:

- TactileView Design Suite w/math accessories
- Duxbury DBT Braille Editor
- MathType Subscription
- 2-hr Online Training
- Email and Phone Support
- Add to any embosser for: \$2,500.00

## TactileView Motorized Drawing Arm (MDA)

### Computer-Driven Drawing

The Motorized Drawing Arm (MDA) by Thinkable is a computer-driven motorized arm that draws tactile graphics by mechanically moving a stylus across the surface of the TactiPad drawing tablet. It aims to combine the accuracy of the digital tactile graphics from the TactileView software with the versatility of drawing by hand on the TactiPad drawing tablet. The MDA opens up unique interactive ways of making tactile graphics easily accessible. Being a low-cost alternative for creating tactile graphics, it will allow you to create tactile images and even expand a drawing in multiple steps by adding successive digital and/or manual elements.

- Sketch tactile diagrams made in TactileView
- Combines the use of digital drawings and drawing by hand
- Draw templates digitally that can be edited by hand
- Includes: MDA & TactiPad Drawing Tablet
