

# Accessibility Consulting

The complexity of digital accessibility can be overwhelming – especially with the fear of legal repercussions and the pressure to ensure compliance.

## Protect Your Brand from Risk!

We know navigating the world of digital accessibility can feel like an uphill battle. Between the looming threat of legal action, the confusion of global standards, and the pressure to ensure compliance, it's easy to feel stuck. And with the rise of digital accessibility lawsuits, the stakes have never been higher.

It's time to clear the confusion and **protect your brand**.

## From Confusion to Clarity

When you partner with BIT, we don't just help you avoid legal pitfalls. We empower your organization by providing the knowledge and tools necessary to ensure your digital assets are compliant, accessible, and ready to engage with everyone. So, you can stop worrying about lawsuits and focus on growth, confident that your digital assets are inclusive and compliant.

# Accessibility Consulting Process

- 1. Assess & Identify** - We conduct a thorough evaluation of your digital assets, from websites to apps, identifying any accessibility barriers that may exist.
- 2. Educate & Empower** - We train your team on global accessibility standards like WCAG, ensuring they understand both the legal requirements and the methodologies for implementing accessible digital products.
- 3. Plan & Implement** - We provide a tailored, step-by-step roadmap that outlines how to address accessibility issues and maintain compliance over time, setting your company up for long-term success.

**Democracy Live** is extremely grateful to partner with BIT on our accessible voting project. The technology reviewed by BIT allows voters across the nation to vote privately and independently. The expertise and deep level understanding of accessibility and ADA requirements by BIT was instrumental in making our OmniBallot accessible voting technology the most deployed accessible elections technology in the nation. Due to BIT's thorough reviews, assessments, and feedback of OmniBallot, we are confident all voters, regardless of disabilities, will be able to vote securely and independently." ~ Bryan Finney, CEO Democracy Live
