

Digital Accessibility Services

The Viscardi Center offers a host of technology services centered around digital accessibility and inclusion. Our product offerings are structured to deliver fully functional and compliant websites, video content, and digital documents that meet all of today's guidelines and specifications for information and communication technology. Our experienced accessibility team ensures Section 508, and Americans with Disabilities Act (ADA) compliance using WCAG standards, with fast turnaround time, secure file transfers, and competitive pricing.

Service Features and Benefits

- ★ **Document Remediation:** Our highly trained team of document accessibility professionals ensure your existing or newly created electronic documents, including PDFs, are fully accessible to people with disabilities and aging individuals using assistive technologies and screen reading software. In addition, we make certain the accessible digital files meet the current Section 508 and WCAG standards and guidelines.
- ★ **Website Accessibility:** Using over six decades of knowledge and expertise within the disability community, our team can help you build or remediate your website to be fully compliant with the latest WCAG guidelines and the ADA, as well as other applicable laws like the ACAA, CVAA, etc.
- ★ **Video Captioning:** We offer flawless open and/or closed captioning for nearly every video format, no matter the video size. We use industry-leading workflow software to ensure all videos are analyzed, encoded, and delivered with quick turnarounds and assured video quality.
- ★ **Live Transcription (CART):** We offer live and remote transcription and captioning services, known as Communication Access Realtime Translation (CART) to ensure your in-person events/conferences, corporate meetings, livestreams and webinars are accessible for people with hearing loss.
- ★ **Audio Description:** Audio description, often called video description, makes your content accessible to people who are blind or low-vision. Audio description gives this audience the opportunity to enjoy television or film programming. It is a narrative description of onscreen actions and visual cues, such as characters and costumes, and text appearing in graphics or the video.
